

home. She was “an anti-establishment figure with a reputation for her fearless criticism of undemocratic elements within the parties in power.” The circumstances of her death were “strikingly similar” to the murders of three additional Indian activists.

Just weeks ago, another of India’s most prominent political journalists, Professor Kancha Ilaiah, known for critiquing India’s caste social order, was threatened by a Hindu member of India’s parliament. This member of parliament, who is an ally of the current BJP government, issued a statement that Kancha should be “publicly hanged.” Kancha subsequently received numerous death threats.

These threats had a significant effect. A mob tried to attack Professor Ilaiah with stones as he and a coworker were driving to a meeting. Kancha is now under self-imposed house arrest because he is simply not safe otherwise.

Was Professor Ilaiah’s crime significant?

Kancha was called a modern-day Dr. Ambedkar, who is known as the “Father of the Indian Constitution,” and Professor Ilaiah’s crime was he was the author of “Why I am Not a Hindu.”

A recent translation of his 2009 book “Post-Hindu India” is what seems to have sparked the threats against him. This book described the polarized context of modern-day India specifically dealing with the productivity of the Dalits and the “low” castes and the seeming spiritual and monetary monopoly of the “higher” castes. These critiques became even more relevant in India’s growing agrarian crisis, the resulting farmer suicides due to hopelessness, and the massive joblessness due to demonetization and economic slowdown.

Mr. Speaker, I stand on the floor of the United States House of Representatives to state unequivocally that the United States and the entire global community is, and should be, deeply concerned about this threat to the life of Professor Kancha Ilaiah, one of the world’s well-known intellectuals.

Our trusted ally and friend, India, is better than this, Mr. Speaker. Professor Kancha Ilaiah’s right and freedom to speak should not be infringed; and his protection, and that of those like him, should be of the utmost priority to the Indian Government. I am able to express freely this viewpoint because we have freedom of speech in the United States of America, Mr. Speaker. May we remember at what cost and for what purpose we were given this priceless freedom.

BREAST CANCER AWARENESS MONTH

The SPEAKER pro tempore. The Chair recognizes the gentlewoman from Florida (Ms. WASSERMAN SCHULTZ) for 5 minutes.

Ms. WASSERMAN SCHULTZ. Mr. Speaker, I rise today to recognize

Breast Cancer Awareness Month for millions of us in the breast cancer community.

The statistics are sobering: one in eight women will get breast cancer in her lifetime.

Earlier this year, I received a note from a former staffer. I had watched this young woman blossom from a young and eager intern to ultimately serving as my executive assistant and scheduler before she departed the Hill for graduate school, marriage, and a future full of promise. In the note, she wrote:

“My wedding was about 2 months ago. It was the most magical night of my life. It was so incredible to be surrounded by so many friends and loved ones and good will. I can’t imagine ever being happier than I was that night.”

She went on to say:

“Unfortunately, things have gotten a little more complicated since then. While I was on my honeymoon, I noticed a small lump in my right breast. Since I had the benefit of working for you, I know that, while rare, it is possible that young women can get breast cancer, and I should take it seriously. I think you can probably guess where this is going . . .”

She continued:

“We have no idea how this happened to me. I guess some people get struck by lightning, some people are deathly allergic to peanuts, and some people get breast cancer at 29 with no family history.

“Luckily, it was caught early and the doctors have every confidence that it is fully curable and I will live a long and happy life.”

She ended the note by thanking me for advocating for breast cancer awareness, specifically for younger women.

She said:

“DWS,” as I am often referred to by staff, “keep fighting the good fight. It is saving the lives of people like me.”

Today, she is fighting the good fight, and I know she will win.

Unfortunately, just like my former staffer, I know all too well that it can strike even when you are young. In 2007, when I was only 41 years old, I learned I had breast cancer.

Like many others before me, when I was diagnosed, and later identified as a BRCA2 gene mutation carrier, I worried about many things: Would I be there to see my children grow up? Would I be able to beat this disease? Wasn’t I too young to have breast cancer?

Fortunately, with the passage of the ACA—the Affordable Care Act—insurance coverage cannot be taken away from people like me and like my former staffer. Access to affordable, quality healthcare is now a right, not a privilege.

As Members of Congress, we have a duty to protect this right. Instead of calling for senseless votes to repeal this legislation, I call on my Republican colleagues to join me in recognizing Breast Cancer Awareness Month

by supporting those of us who are living healthier, stronger lives every day because of the Affordable Care Act.

The statistics for breast cancer remain alarming. The American Cancer Society estimates that 40,610 women will die from breast cancer in 2017 alone, making it the second most common type of cancer death in women.

Between the ages of 60 and 84, breast cancer incidence rates are markedly higher in White women than Black women. However, Black women have a higher incidence rate before age 45, and are more likely to die from breast cancer at every age. This is wholly unacceptable.

We must take action to provide women with the preventative services and screenings available while educating them on their risks and treatment options.

That is why, in 2009, I introduced the EARLY Act, a bipartisan bill that became law as part of the Affordable Care Act, to focus on equipping young women with the tools they need to make informed decisions regarding their breast health.

I am proud that the EARLY Act was reauthorized in 2014, and even more proud that it has, and is, helping young women like my former staffer.

This Congress, I also introduced the PALS Act with my good friend from Indiana, Congresswoman SUSAN BROOKS.

This bill would extend the moratorium on the United States Preventive Services Task Force mammography screening guidelines to ensure women have access to lifesaving mammograms beginning at age 40.

It would also ensure women who have served our country—our women veterans—don’t have to face these same obstacles in getting the care they and their healthcare providers deem necessary.

Because many insurance companies use the USPSTF guidelines as the basis for coverage, 22 million women between ages 40 and 49 could be at risk of losing coverage for this lifesaving screening.

The bottom line is the vast majority of experts recommend beginning screening mammograms at age 40. Women need to be able to follow this guidance until scientific consensus can be reached.

As someone who was diagnosed at just age 41, I can tell you that women need guaranteed access to these tests beginning at age 40.

We must also ensure the National Institutes of Health has the funding it needs to continue their progress.

I will continue to use my voice and my vote as an appropriator to ensure that critical funding is provided through the annual appropriations bill for breast cancer research, services, and support.

My story and my former staffer’s story isn’t unique. That is why we must do more to support our mothers, sisters, daughters, and friends who are

battling or who have survived this deadly disease. And we must do everything we can to eradicate breast cancer once and for all.

I look forward to continuing to work together with all of you—my colleagues on both sides of the aisle—and with the advocacy community to help women know their risk, discover cancer early, and access the best treatment possible.

HONORING THE MEN AND WOMEN OF EDWARDS AIR FORCE BASE

The SPEAKER pro tempore. The Chair recognizes the gentleman from California (Mr. KNIGHT) for 5 minutes.

Mr. KNIGHT. Mr. Speaker, yesterday, I, along with my good friend, MARCY KAPTUR, reestablished the NASA Caucus.

Last week, I spoke about the 50th anniversary of my father's absolute airspeed record flight that happened on October 3, 1967. Two weeks ago was the 70th anniversary of the Air Force. On Saturday, we welcome the anniversary of supersonic flight.

For years, there was a thought that there was a barrier present to stop aircraft or inhibit flight controls. Many believed attempting to pass through this barrier would be fatal.

Well, on October 14, 1947, Captain Charles E. "Chuck" Yeager was dropped from a B-29 at about 45,000 feet and quickly accelerated through that invisible barrier we know as the speed of sound.

The first man to achieve Mach 1, we know that as something simple today, but for the last 70 years, it was because of one man that we get to do this.

General Yeager retired in 1975 as a brigadier general, after 34 years of flying, for the Army Air Corps and for the United States Air Force. What he achieved that day was something that many men didn't think would happen.

There were about two or three pilots at Muroc or the Army air field out at southern California that were trying to do it, but absolutely there was only one that did it. Captain Yeager, flying the Bell X-1, that he renamed Glamorous Glennis after his wife, was the man who achieved that.

I am proud to represent the men and women of Edwards Air Force Base with my good friend, Leader KEVIN MCCARTHY. And I understand what they do on a daily basis from the F-35, to the F-22, to all of the aircraft that happen out there at Edwards, to all of the flying expertise that they have on a daily basis. I am very proud of them. I am proud of what Edwards Air Force Base means to the country, and I am proud of what they mean to the history of this Nation. But I am most proud of the men and women because on a daily basis they create history. For that, I am most proud.

HONORING U.S. ARMY SERGEANT LA DAVID T. JOHNSON

The SPEAKER pro tempore. The Chair recognizes the gentlewoman from Florida (Ms. WILSON) for 5 minutes.

Ms. WILSON of Florida. Mr. Speaker, I rise today in remembrance of U.S. Army Sergeant La David T. Johnson, who was killed in Niger, West Africa, during an ambush carried out by Boko Haram and other extremists linked to ISIS.

This tragic loss of a life, still so young and so full of promise and potential, is one of the saddest ironies that I could ever imagine. Sergeant Johnson was just 25 years old, the father of two children, and a beloved member of the Miami Gardens community in which I reside.

He and his two younger brothers, Keon and Richard, are proud members of the 5,000 Role Models of Excellence Project, an in-school dropout prevention program that I created soon after Sergeant Johnson was born, to ensure that he and other boys and young women of color have unfettered access to roads to success. Five thousand Role Models members all over the world are mourning his death.

Sergeant Johnson is married to Myeshia Johnson and has two children, and Myeshia is expecting their third child.

I sprung into action after Boko Haram kidnapped 276 schoolgirls in their boarding school in Nigeria. I traveled to Nigeria four times in my quest, and I have initiated the "Bring Back Our Girls Wear Red Wednesdays" in the Congress of the United States. I appreciate the support, especially from our leader, NANCY PELOSI.

I traveled there in August and met over 100 girls who were once hostages of Boko Haram. I wanted them to know that this Congress loves them and we will never, ever forget them.

Boko Haram actually means "Western education is a sin." They believe girls should be denied the privilege of an education, and they have killed more people than ISIS. In fact, they have joined forces with ISIS in the region and have killed over 20,000 Africans, sexually abused women and girls, and sends them on suicide missions using babies as decoys.

More than 1 million people have been displaced from their homes and are starving to death. What a tragedy. It would be an even greater tragedy to allow the deaths of Sergeant Johnson and his comrades—Staff Sergeant Bryan C. Black, 35, from Washington; Staff Sergeant Jeremiah W. Johnson, 39, from Ohio; and Staff Sergeant Dustin M. Wright, 29, from Georgia—be in vain.

Nearly a year ago, this Chamber voted unanimously for legislation that Republican Senator SUSAN COLLINS from Maine and I introduced that directs the Secretary of State and the Secretary of Defense and the Director of National Intelligence to jointly develop a 5-year strategy to end Boko

Haram's reign of terror. The law also calls for a plan to assist the Nigerian Government, the Multinational Joint Task Force, and international partners in their efforts to counter this regional threat.

□ 1045

Our soldiers were not there to fight but to provide training and assistance to the Nigerian Army forces and the multinational joint task force created to combat Boko Haram.

Yes, my heart breaks for this monumental loss, but it is also bursting with pride for all that he achieved and would have accomplished. During the few years in which he bravely served our Nation, he received several awards and accolades, including the Army Achievement Medal, the Army Service Ribbon, and, ironically, the Global War on Terrorism Medal.

Boko Haram is a threat to the many nations across the globe that, like the United States, have committed monetary and human resources to help defeat this terrorist group, and we must never ever forget that this heinous organization's daily list of casualties could include one or more of our own, like Sergeant Johnson, Staff Sergeant Black, Staff Sergeant Jeremiah Johnson, and Staff Sergeant Wright.

May they rest in peace.

BREAST CANCER AWARENESS MONTH

The SPEAKER pro tempore. The Chair recognizes the gentleman from Kansas (Mr. MARSHALL) for 5 minutes.

Mr. MARSHALL. Mr. Speaker, as an OB/GYN and now a U.S. Congressman, I want to continue to highlight October as Breast Cancer Awareness Month.

One out of eight women will develop breast cancer. Let me say that again, Mr. Speaker. One out of eight women will develop breast cancer.

If you are a woman over the age of 35, you should ask your physician if you need a mammogram; and certainly if you are over the age of 50, every woman needs a mammogram every year.

A mammogram is quick, it is easy, and the great thing about mammograms is how easy it can be to catch breast cancer at its very early stages and give us a great chance to treat the problem.

Over my career as a physician, we have helped hundreds of women who have successfully fought this dreaded disease. There are great treatments out there and ways we can save lives, so I encourage every woman over the age of 35 to talk to their physician about a mammogram. It is one thing to be aware of breast cancer, but it is another thing to do something about it.

NATIONAL WOMEN'S SMALL BUSINESS MONTH

Mr. MARSHALL. Mr. Speaker, I rise today to join the National Women's Business Council in recognizing October as National Women's Small Business Month.
